Dear [REDACTED],

My name is On Kin Cheang. I was born and grew up in Macau, China. When I turned the age of 15, my family and I moved to the States. Since I am a first-generation college student, I did not know much about colleges/universities. The first time I heard about Texas Tech was after a conversation with a high school advisor. Later, I decided to visit the campus, and after talking to a general advisor, I immediately fell in love with this welcome community and friendly advisor. That is when I decided to attend this university.

In this upcoming Fall of 2022, I will be continuing with my civil engineering study as a senior at Texas Tech University. During my college time, I enjoy making new friends. I also participate in the American Society of Civil Engineers organization, the Texas Society of Professional Engineers, and the Tech Chinese Language and Culture Association.

I had an internship at the Texas Department of Transportation while working as an assistant engineer. I also had a full-time position working as a project engineer back in Macau. I like the civil engineering work field because a civil engineer design can benefit a group of civilians, unlike doctors who can only help one person at a time. Therefore, I am excited about what I can bring to our society, and current and future civilians.

This scholarship will help me to achieve and focus on my academic and career goals. It will also allow me to work fewer hours throughout my studies.

Thank you very much for your generosity.

Sincerely,

On Kin Cheang

Dear Markie:

The Edward E. Whitacre Jr. College of Engineering was one of the four original schools that formed Texas Technological College, which would later become Texas Tech University. During the last 100 years, many students have benefitted from philanthropic support such as yours and continue to do so today.

The enclosed thank you letter(s) are designed to show you how much of an impact *you* have made through your scholarship on our future Red Raider engineers. Scholarships allow the college to recruit the best and brightest students, and help make a college education more affordable by lowering the financial impact on a student or family. Scholarships also help students stay focused on learning and achieve academic success.

As we celebrate Texas Tech's Centennial and look forward to the next 100 years, scholarships such as yours will continue to play a significant role in educating the next generation of engineers and leaders. Thank you again for investing in their futures and for your generosity.

If you have any questions or need assistance, feel free to contact me at (806) 834-2845 or Mackenzie.hamilton@ttu.edu.

With deepest appreciation,

Mackenzie Hamilton
